

## Becoming an Xplor Collegiate Chapter

Membership in Xplor International opens up a whole new world of professional possibilities for you. As a member, you have immediate access to information, educational content, opportunities for professional development and networking.

Xplor's new collegiate program is designed to immerse you within the document technology and communications industry offering competitions, activities, leadership opportunities and access to industry leaders. Affiliating with an Xplor Chapter on your campus can be both professionally and personally a rewarding experience.

The basics to affiliate with Xplor International:

- Submit a petition containing the signatures of 10 collegiate students who are willing to become Xplor members and the first members of your chapter
- Find a faculty member on your campus who will serve as faculty advisor to the Chapter. This person must also become an Xplor Professional Member.
- Submit a constitution (Xplor provides template)
- Submit the petition and constitution for approval and processing.
- If everything is in order, Xplor will send you a Chapter Charter, recruitment and promotion and materials.

By affiliating with Xplor International, you agree to submit required reports each year to remain affiliated. The Officer Report Form, Chapter Plan, and Annual Report are due each year by March 15<sup>th</sup>.

Networking is a major benefit of starting a Xplor chapter driven by the activities the local chapter pursues, and the leadership opportunities available to the students in running those activities.
